Recommendations

1. Keep doing what you are doing for most things! You and your staff are very much appreciated. Congratulations.
2. It does show that they are a little unhappy about your waiting area so you might look into improving it.
3. Providing healthy living advice Qu.7 is something that is not done well so it might be useful to think of ways that you and your staff could weave the health messages into general conversation with your customers and actually hand out lifestyle leaflets to customers.
4. Your demographics may suggest not stocking baby and children items, as 92% of your respondents are over 45 with only 5% having children under 5, but increasing your self indulgent ranges for the older person, with more disposable income because 65% have no dependents.
